Forminator Add-on MU Plugins

https://bit.ly/forminator-addon-mu-plugins-by-i12r

The collection of Forminator addons created as must-use plugins that add new features to the popular submission plugin.

Features implemented:

- Validates the age with a age range of 15 to 24 years old
- Imports Forminator submissions from CSV in uploads directory
- Overwrites the existing files submitted through the upload form field

Newsgen News API Plugin

https://bit.ly/newsgen-news-api-plugin-by-i12r

The plugin is a flexible news generator, that creates a separate shortcode for a broad range of news topics by utilizing the News API.

Features implemented:

- Created an Admin page using Admin notices (WordPress standard) for the admins to provide API credentials for the News API, auto-refresh rate, number of news to display on the frontend via shortcode, and selecting predefined or custom news topics to generate the shortcode for that topic.
- Displayed via AJAX, the list of generated shortcodes of the news topic on the same page and the ability to completely remove a generated shortcode using AJAX.
- Stored the news for each topic on separate WordPress Transients to serve the news on the frontend without requesting the News API on every page load.
- Implemented WordPress CRON to automatically fetch the latest news for each news topic based on the interval set by the user under the auto-refresh rate option.

User Review Plugin

https://bit.ly/user-review-plugin-by-i12r

The plugin enables the users to submit their reviews and the admins to view all the submitted user reviews.

Features implemented:

- Implemented an AJAX-based user form and a custom database table by implementing the database abstraction layer.
- Created AJAX-based admin-only table to show the list of user-submitted reviews.
- Displayed review at the table bottom in full detail via AJAX upon a click on an individual review.
- Developed custom AJAX-based pagination for the user's review table.

Users Data Fetcher API Plugin
https://bit.ly/users-data-fetcher-api-plugin-by-i12r

The plugin fetches user's data from a custom API endpoint and makes that data accessible from an AJAX endpoint. The users' data is then displayed using the admin page as well as via a shortcode on the frontend.

Features implemented:

- Created an AJAX endpoint that retrieves the data from a custom API endpoint with a one request/hour limit as default.
- Provided a WP-CLI command for the admin to override the one-hour limit.
- Implemented transient to fetch and display the data on the admin page or frontend via shortcode according to the set limit.
- Provided functionality on the admin page only to refresh the data from the API endpoint.
- Implemented modern PHP techniques like OOP, namespace, PSR4 autoloading, Composer, etc.

Dynamic Early Bird Discounts Plugin
https://bit.ly/dynamic-early-bird-discounts-plugin-by-i12r

An extension to the implemented registration system, the plugin enables the admin user to set five different discount rates (early bird discounts) based on the purchasing dates of the event tickets.

Features implemented:

- Computed the ticket price for the attendee(s) based on the available discount rate offered on the purchasing date of the ticket.
- Set the original ticket price without discounts during the day of the event and beyond.

WP Unit Converter Plugin
https://wordpress.org/plugins/wp-unit-converter/

The plugin allows the user to convert the metrics into numerous different units of measurement.

Features implemented:

- Integrated JavaScript dates library.
- Provided shortcodes for each measurement unit like Length/Distance, Temperature, Time, Weight, Area, and Speed.

REST API Generator Plugin
https://wordpress.org/plugins/wp-custom-rest-api-generator/

The plugin enables the user to show/hide different data types of all available Post types including custom Post types in the WordPress REST API of the website.

Features implemented:

- Extended the WordPress REST API for the core WordPress data types like the author, image sizes, custom fields, and taxonomies using easy to user interface under the Admin dashboard.

Training for Pakistan – A USAID funded project
Main site: https://training4pakistan.com/

Reference site: https://www.worldlearning.org/program/training-for-pakistan/

A USAID-funded project, led by The Kaizen Company, to provide needs assessment services and capacity-building programming to address gaps in skills and knowledge across USAID's portfolio aka alumni in Pakistan.

Features implemented:

- Developed PSD to WordPress theme including landing pages using WPBakery.
- Extended users (alumni) information using custom Meta fields as well as build REST API endpoints for the total alumni as well as for the individual alumni with JWT authentication.
- Consumed the individual alumni API upon each alumni registration by storing the data to the Kaizen Company's central MIS system using the Guzzle library.
- Stored the same registered alumni data on the website database after a successful response from the API of the MIS system of the company.
- Integrated a customized voting system for the alumni to select the best representatives across different regions.

Contractors Website Revamp
https://uptek.dev/contractors-staging/profit-day/events/

A platform for independent contractors to help grow their business.

Features implemented:

- Developed PSD to WordPress theme using Elementor Pro.
- Created custom images-only menu using ACF Pro.
- Implemented dynamic events using the Dynamic Tags feature.
- Deployed the website on the Multisite network.

Allin1Beauty
https://Allin1Beauty.nl/

A beauty salon based in the Netherlands.

Features implemented:

- Developed PSD to WordPress theme using WPBakery.
- Implemented Multi-language feature using WPML.
- Produced documentation and provided training.

The Lil Tutu Kids Store
https://theliltutu.com/

An international online clothing brand for children.

Features implemented:

- Developed PSD to WordPress theme using WPBakery.
- Customized WooCommerce add-on for currency conversion.
- Deployed the store on AWS EC2 T3 instance.
- Produced workflow documentation.
